

## INVESTIGATING AN INFORMATION SECURITY INCIDENT

### When You Need An Unbiased Response To An Incident.

**When your organization suffers an information security incident you have a crisis on your hands. Incidents often involve a degree of uncertainty and you may not know its origin – internal or external.**

“Due diligence” on your part requires that you get to the bottom of the incident and make the necessary and correct decisions. You need quick answers, but they have to be good answers, expert answers, unbiased answers — that’s why Withum Incident Response Investigatory Support (IRIS) was created.

IRIS™ provides a rapid, tactical, single incident investigation of the event. We support your internal teams by providing an external, expert, and unbiased perspective. IRIS™ takes a comprehensive, three-dimensional approach, making sure all relevant cross-channel input and multidisciplinary considerations are taken into account. This helps eliminate tunnel vision, thereby contributing to better-informed decisions.

During an incident, evidence is highly perishable. IRIS™ ensures that intra-investigative decisions avoid burning critical bridges that limit future options. And to better protect your business assets, discoveries from an incident investigation may be seamlessly upgraded into the Withum CFI/e-Discovery® program, which may be useful for subsequent criminal, civil, regulatory, fact-finding, employee misconduct investigations or for business intelligence purposes.

### **IRIS™ PROVIDES A RAPID, TACTICAL, SINGLE INCIDENT INVESTIGATION OF THE EVENT.**

At completion of the IRIS™ service, you will have an impartial report in the incident’s impact, a holistic picture of what happened, identification of potentially serious concealed risks and a cost effective remedial plan.

WE ARE AN INDEPENDENT MEMBER OF  
**THE GLOBAL ADVISORY  
AND ACCOUNTING NETWORK**
