

MICROSOFT TEAMS ASSESSMENT

Get the most out of your workplace applications, and drive collaboration with insights on the business, cost, and technology benefits of leveraging Microsoft Teams for your organization.

Modern Business in the Cloud is the New Normal. Today's world reflects a new reality; Technology is ever-present through the cloud, offering easy access to digital services. Capitalizing on this shift is key to your organization's innovation and growth. However, this path forward brings new challenges: uncertainty in prioritizing business apps for transition, concerns about legacy systems and migration blockers and finding the right technology to connect global teams.

STREAMLINE YOUR MOVE TO THE CLOUD

With the Microsoft Teams Assessment, we take a four-phased approach for your cloud journey.

ASSESS AND DISCOVER

- Gather accurate data from your IT environment
- Real-time details on your environment
- Identification of cloud transition blockers and collaboration security risks

PLAN AND DECIDE

- Determine what changes are top priority
- Understand how Microsoft Teams can increase agility and efficiency
- Identify opportunities for improving business processes

MIGRATE

- Develop a roadmap for your organization's cloud journey
- Cost analysis of application migration to Microsoft Teams
- Prioritize end user tools and business apps for transition to the cloud

OPTIMIZE

- Engage us to help you measure your progress
- Track and achieve milestones using custom migration plans
- Establish a utilization baseline for assessing progress over time
