

INFORMATION AND PHYSICAL SECURITY PROGRAM

Withum Phoenix® — Powerful Returns On Your Spend.

Withum Phoenix® brings comprehensive solutions and services to not just provide protection, but manage risk at an acceptable cost. We take an unconventional view to information and physical security spending. Your spending only has value if it integrates effective protection with efficient risk/reward mitigation.

But Withum Phoenix® does more than combine world-class protection assurance with targeted risk management — it creates a comprehensive security strategy. It's a risk/reward based strategy, focused not just on technology, and physical security controls, but a holistic package that takes into account people, processes, costs, and effectiveness measurement to determine whether your program actually delivers true value.

Withum Phoenix® utilizes a proprietary four phase approach to identify, build, and nurture the appropriate strategy for your organization. The phases assess your current status, report on urgent issues and important 'quick win' action steps, outline a roadmap for interim and longer-term improvements, and provide people, process, technology and physical security considerations to increase protection, eliminate wasteful spending, and demonstrate an improved return on investment.

Withum Phoenix® can be implemented in phases, enabling you to measure its effectiveness as you move forward. Withum Phoenix® is exclusively provided on an insourced basis, and always customized to your needs and requirements.

WITHUM PHOENIX® DOES MORE THAN COMBINE WORLD-CLASS PROTECTION ASSURANCE WITH TARGETED RISK MANAGEMENT — IT CREATES A COMPREHENSIVE INFORMATION AND PHYSICAL SECURITY CONTROLS SECURITY STRATEGY.
