

You Know You Need A Plan. What Is It?

How do you ensure that your business assets are protected?

Penetration tests, vulnerability scans or security audits can help, but these exercises can only go so far. They might illuminate a weakness in a specific area, but that's just one small sample. However, what about the rest of your business assets? Or, even if nothing was uncovered, can you conclude that the assessment ruled out everything? And, are the assessments focused on what really matters, the things that keep you in business?

Withum e³ Red Team[®] will support, secure and strategize for a stronger, more proactive approach to ward off disruptions and harm to your critical business assets, while getting more value out of your expenditure. Withum e³ Red Team[®] has a name derived from the military, as it mimics internal and external threats from an adversary's perspective. Our e³ Red Team[®] provides a tailored plan, a proven structure, and an effective delivery mechanism to address what really matters to your business. Withum e³ Red Team[®] diagnoses the health and safety of all your critical business assets, not just technology, and provides unbiased checks and balances necessary to minimize risk on an ongoing basis. This can be delivered either on an external or insourced basis.

WITHUM E³ RED TEAM[®] PROVIDES PROOF OF YOUR INFORMATION SECURITY PROGRAM'S EFFECTIVENESS.

If gaps exist, you get a holistic and cost-effective plan to deal with the risk. Knowledge builds confidence.

SECURE AN EFFECTIVE SECURITY PLAN TODAY.
