

DATA PRIVACY, REGULATORY AND SECURITY CONTROL ASSURANCE

Regardless of where your organization is located or does business, you are likely required to comply with the multiple countries' or states' privacy laws. The growing complexity and nuances of domestic and international privacy laws demand a comprehensive data privacy and security compliance approach.

The Withum Cyber and Information Security Team, in partnership with external legal counsel, provides your organization with data privacy assurance and document compliance of your organization's privacy and cybersecurity practices with data security and privacy laws. Whether it is policies and procedures, controls, frameworks, data mapping and compliance with federal, state and international data privacy laws including GDPR, CCPA, NY-SHIELD, NYDFS (23 NYCRR 500), GLBA, APEC, CNIL, CSA, COPPA, HIPAA, FERPA, etc., we can assist in ensuring your organization is not only ready and/or compliant but work to leverage and maximize your organization's return on investment on technology and business spend.

Depending on your requirements, Withum Cyber Team data privacy assessments may combine expertise from Virtual Chief Information Security Officers (vCISO), Virtual Chief Compliance Officers (vCCO), data privacy technical specialists, former military penetration and vulnerability experts, as well as external legal counsel to provide your organization with the best interdisciplinary industry expertise to back the assessment and offer a validation of the environment via a certification of your organization's data privacy and cybersecurity ecosystem. Keep in mind that your organizations data privacy requirements often extends beyond your physical and network boundaries. Withum's cyber and data privacy team can provide customized data privacy assistance on the collection, use, disclosure, and management of personal information on your organization, as well as vetting your third party suppliers that interface with your business.

Ask about Withum data privacy service level agreement subscription services which helps ensure that your organization stays up to date with rapidly changing data privacy regulations and remains compliant. Since businesses, networks, and regulatory requirements are in a constant state of flux, having Withum providing third party oversight with our data privacy and security appliance devices is a smart choice. We offer a dashboard interface and metrics on your organizations data privacy, assessment status, the ability to address data privacy and security violations expeditiously, and proof of your organization's compliance with regulatory requirements for internal and external stakeholders.

71+
COUNTRIES

Our experts have provided data privacy and security services in over 71+ countries and counting, including in areas with some of the strictest data privacy and regulatory regulations, e.g. Iceland, Switzerland, Cayman Islands, Isle of Man, Guernsey, UK, Italy, Germany, across South America, EU, Asia, and more.

FACT

While privacy compliance requirements are becoming increasingly complex and cybersecurity threats and the frequency of cyberattacks are increasing, organizations can, with the proper level of compliance and cybersecurity measures, successfully reduce the likelihood of compliance failures and mitigate the impact of cybersecurity incidents.

CONSIDERATIONS

Several studies show that delays, adopting a "wait and see," or "it won't happen to us" approach, will cost your organization significantly and will result in lost time, revenue and increase the risk of litigation and regulatory sanctions. The Withum Cyber Team and external counsel stands ready with a team of genuine experts who have a track record of success in over 71 countries and counting to support your organization.

INCREASE EFFICIENCY

Utilize the leadership of a vCISO, vCIO, vCCO, and external legal counsel along with a complete information data privacy and security team to build processes, implement controls and identify areas for increased opportunity to lower the organization's overall risk.

FACT

Most organizations are understaffed and lack the appropriate expertise. Outsourcing your compliance and security team helps build an effective program without adding to your overall headcount. Thus, it enables an organization to scale up or down, as needed, and provides better industry leading expertise to address constantly escalating threats and evolving regulatory landscapes.

IMMEDIATE IMPACT

Working with a skilled team that has vast expertise in tailoring and launching data compliance and security solutions:

- Ensures your program is built and operating efficiently by aligning organizations to industry regulations/standards such as NIST, ISO, GDPR, HIPAA, NY-SHIELD and CCPA.
- Provides immediate leadership to ensure controls, compliance at the forefront, and baked into your organization's framework.

Withum vCISO, vCIO, vCCO, and external legal guidance, as needed, provides the ability to grow an organization's maturity immediately in all aspects of information security and data compliance.

COMPLETE COVERAGE

Our full-service solution gives you everything you need to continuously manage your data privacy, regulatory and security program from start to finish. We provide all the resources you need to be successful. To minimize risk and maximize return-on-investment, it is imperative that controls are applied consistent with protection and investment payoff.

CONSIDERATIONS:

Noah built the ark before it rained; not after. Smart businesses build their 'ark' prior to the inevitable storm, not post impact. Let Withum build a track history of success and compliance now for your organization to Be in a Position of StrengthSM.

FACTS

500+

During COVID-19, cyber-attacks increased ~500%+.

11

SECONDS 

Data breaches will occur every 11 seconds by 2021 with data privacy violations on the rise.

Data privacy laws allow private plaintiffs to bring civil actions against an organization in the event of a data breach.

Using a 3rd party to process or store your data, e.g. Amazon, Microsoft or other cloud provider, does not offset your risk. It may increase the risk.

A cloud provider's data privacy and security adherence do **NOT** mean your organization is compliant and secure.

8.19M

Average Cost of a Data Breach in the United States.

Your organization's ability to adapt and implement technology effectively will not only reflect its bottom line, but its ability to meet its core objectives.

Cyber-attacks will increase, not decrease over time. Investors and donors are undergoing increased due diligence of an organization's cyber fitness.

Leave the cyber impacts and disruptions to your competitors. Contact the Withum Cyber and Information Security Team at (800) 470 0988 or email wcyber.info@withum.com.
