

Withum will ensure that your business and critical assets are protected from constantly evolving threats. The proven Check-Up, Diagnosis and Treatment cycle discovers business risk, diagnoses root causes, applies a pragmatic treatment strategy and tactical action plan to mitigate risk quickly while eliminating risk recurrence.

In today's modern business environment, it's critical that all organizations not only understand regulatory requirements across borders; but also align and validate their security strategy, controls and framework(s) to ensure compliance.

Withum Protection Assurance™ is uniquely designed to help you protect these and other critical business capabilities, assets and regulatory requirements with a high degree of success and cost-efficiency.

ADVANCED SECURITY SERVICES

Withum Protection Assurance™ is based on a set of advanced security services specially developed by Withum's experts to assure effective protection of 'what matters most' to your business. Taking a structured and holistic approach, Withum's advanced security services can be independently applied or; for maximum protection, integrated to deliver an enterprise-wide solution to adaptively mitigate risk from constantly evolving threats.

WITHUM PHOENIX™

Ensures the information security strategy and implementation is accountable, cost-effective and tailored to your organization's needs.

WITHUM ARCHANGEL™

Risk management and security review done to the US Department of Homeland Security critical infrastructure protection specifications by those who created and wrote the US National Infrastructure Protection Plan (NIPP).

WITHUM PHYSICAL SECURITY ASSURANCE™

A targeted risk assessment or single incident investigation support related to infrastructure and non-data related security concerns.

WITHUM CFI/E-DISCOVERY™

You need an unbiased, well respected, and proven eDiscovery, cyber forensics and advanced data recovery program to support stakeholders, e.g. legal, regulatory, security, incident response, and data recovery demands.

WITHUM IRIS™

You discover that you've had an incident: you need to find out what happened quickly and objectively while identifying and preserving evidence as appropriate.

WITHUM INTELLECTUAL PROPERTY ASSURANCE™

Quick assessment of your organization's data to assist in answering three key questions; where is my company's confidential data, how is it really being used, and are we appropriately preventing confidential data loss?

WITHUM E³ RED TEAM™

You wish to ensure critical business assets and operations are resistant to compromise from realistic and probable threats.

WITHUM E³ PULSE™

You wish to ensure the proficiency of key security controls and capabilities responsible for protecting your business's critical assets and operations.

DATA PRIVACY

In today's modern business environment, it's critical that all organizations not only understand regulatory requirements across borders, but also align and validate their security strategy, controls and framework(s) to ensure compliance.
